Report on Risk Management

RISK ANALYSIS AND MITIGATION

The identified risks are analysed according to their likelihood of occurrence and significance of their consequences. Based on the risk analyses and subsequent evaluation for treatment priority, the appropriate risk mitigation strategies are devised to treat the risks accordingly. The following illustrates risk profiles in general and describes generally the respective risk mitigation strategies of the Company.

RISK A

The risk must be managed by senior management with a detailed action plan or significant senior management attention is required. Extensive management of the risk is essential with focus on both reducing the likelihood of the risk and mitigating its consequence. Guidance from Board of Directors may be required where appropriate.

RISK B

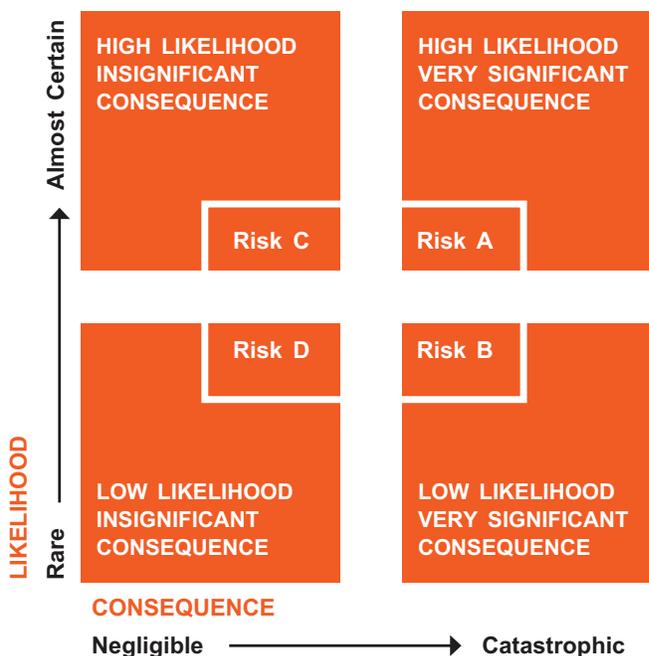

Considerable management attention is required including specifying management responsibility. Given the significant consequences of the risk, preventive control measures must be maintained effectively with regular assessment thereof in order to maintain the likelihood of the risk occurring at a low level. Ideally, contingency measures should also be maintained to mitigate the consequence of the risk should it eventuate.

RISK C

While the consequence of the risk is insignificant, its high likelihood of occurrence should be reduced. Management should monitor the risk; identify its root causes; and design and implement corrective measures to reduce its likelihood of occurrence.

RISK D

The risk may be managed by routine procedures or may be worth accepting with monitoring by management. The risk may also not need specific application of resources in which case the risk is accepted by management.

OVERSIGHT AND REPORTING STRUCTURE

The Risk Management Committee has been convening every quarter since 2009. This Committee is chaired by the CEO and addresses all strategic and related issues that impact the business and the adequacy of the mitigation measures that have been put in place. This Committee consists of all business, technical and financial heads of department. Effectiveness of the measures taken and follow-up actions are also part of the Agenda. In Quarter 3 2010, a decision was made by the Committee to convene the EWRM meetings on a half yearly basis instead of the current practice of quarterly review. This is to ensure that sufficient time is given, not only for the implementation of the various action plans, but also to verify the effectiveness of such actions taken.

The operational risk registers continue to be updated by the risk owners on a six-monthly basis as a separate exercise. The relevant strategic issues are to be escalated to the Audit and Risk Management Committee meetings for further deliberations and update. This ongoing process would help to further enhance the risk management culture and processes in the Company.
